Calliope Paths

**Empowering Employment, Stability, and
Mental Wellbeing for Enactus Summer
Sprint.**

Presented by
Team Calliope Paths

Problems & Needs

Savings buffers are critically low among vulnerable groups, leaving many without financial resilience.

Unemployment remains a persistent issue, disproportionately affecting younger and less-skilled individuals.

Rates of anxiety and related mental health challenges have been rising steadily, compounding economic hardships.

Brief Overview

Across our target community, many individuals face a combination of unemployment, unstable income, and limited access to mental health support. These issues create a cycle where financial insecurity worsens wellbeing, and poor mental health reduces the ability to seek and retain employment. The lack of integrated solutions addressing both economic and psychological needs leaves many without a clear path to stability.

Purpose of The Presentation

We aim to clearly define this interconnected problem, explain the specific needs we have identified, and present Calliope Paths as a comprehensive response that combines employment pathways, income support strategies, and accessible mental health resources. This presentation will show how our approach meets urgent needs while building sustainable, long-term impact.

Why this Matters **Now**

- Youth Unemployment: 12.5% (538,000) of 16–24-year-olds unemployed, up from 10.5% pre-pandemic, higher than EU average.
- Mental Health Gap: 28% of young adults need but don't access mental health support due to cost (42%), stigma (27%), and long waits (12 weeks avg).
- Income Instability: 4.4M in insecure work; 37% see >£300/month income swings; only 1 in 5 have 1-month savings.
- Why Now: Without action, annual losses could reach £6.9bn in productivity, £25bn in NHS/economic costs, and 600k workers pushed into debt.

Why Existing Systems Aren't Closing the Gap

Root Causes & System Gaps

Lack of tailored training & support

Low skills, confidence & networks

Difficulty accessing meaningful jobs

Long-term instability & poor mental wellbeing

Fragmented systems fail to address combined needs

- **Rigid Programs:** Few employability schemes provide fully tailored, holistic support for people with complex needs. Survey evidence from 2023 shows that individuals typically face around 2 to 2.5 overlapping barriers to work, such as mental health challenges combined with skills gaps.
- **Fragmentation:** Integration between employment and mental health services remains limited. While no robust national percentage is available, existing evidence suggests coordination is patchy, and many people must navigate multiple separate systems to access the support they need.
- **Siloed Funding:** Billions of pounds are spent annually across employment and health programmes, yet funding streams remain largely separate. Pooled or jointly commissioned budgets are the exception rather than the norm.
- **Short-Term Focus:** Major DWP employment schemes have historically paid more for achieving job outcomes and sustainment than for initial job starts. However, incentives for broader wellbeing gains remain limited, keeping the focus narrow.

Target Audience

Demographic Profile

We focus on five high-need groups: NEET youth aged 16–24, low-income students balancing study and work, refugees and asylum seekers facing integration barriers, single parents juggling childcare and employment, and gig or zero-hours workers living with income volatility. These groups share elevated risks of unemployment, instability, and limited access to mental health support.

Psychographic Profile

Our audience is motivated but resource-constrained eager to improve their situation yet blocked by financial, time, and institutional barriers. They are resilient but stuck in cycles of instability, often mistrusting formal systems. Many live in multi-need households where employment, wellbeing, and financial challenges overlap, yet they are open to digital and community-based solutions when accessible and affordable.

Target Audience Visualisation

Target Groups & Reachability

Group	Need	Reachability	Primary Access Channel
NEET Youth	High	Medium	Schools/colleges, youth organisations, Jobcentre Plus
Low-Income Students	Medium	Very Easy	Universities, student unions, careers services
Refugees & Asylum Seekers	High	Very Difficult	Refugee NGOs (e.g., TERN/Refugee Council), local councils
Single Parents	High	Medium	Family hubs, childcare providers, local councils
Gig & Zero-Hours Workers	Medium	Easy	Platforms/forums, community centres, unions

Calliope Paths

Our Integerated Solution

An integrated loop, not a service bundle: Gains in one area (e.g., employment) support stability and mental wellbeing, creating reciprocal reinforcement across all pillars:

England's 2022-23 program saw 37% of 42,340 learners secure jobs (DfE, 2023). Generation UK reports 90% employment within six months, with 70% covering basic needs and 40% maintaining savings for 2-5 years (2023). These targeted training programs effectively bridge skills gaps while delivering measurable economic benefits for participants.

Wellbeing (MHFA training): Mental Health First Aid training shows moderate-to-large gains in knowledge and moderate improvements in confidence (Morgan et al., 2018). Between 68–88% of trained staff reportedly apply these MHFA skills when helping someone in distress ([Kitchener & Jorm, 2020](#)).

Reinforcing loop: Employment ⇌ Financial Stability ⇌ Mental Wellbeing

SCAMPER ELEMENTS

Substitute

Switch to hybrid Bootcamps to cut travel/childcare barriers; save ~£90/learner via open-access training (Ofcom, 2024; SPARC, 2018).

Modify

Pilot on WhatsApp/Slack (95% uptake) before full app; personalise depth via guided MH tools (Ofcom, 2024; JAMA, 2021).

Combine

Pair Mental Health Cafés + skills sessions; add savings circles to boost saving by 40–50 pp (Morgan et al., 2018; Nest Insight, 2024).

Put to Another Use

Use shared venues; 78% live within 30 min walk of a library (Libraries Connected, 2024). We can incentivize income stability with coupons/discounts

Adapt

Extend the Gig Project Marketplace to non-digital tasks (community translation, local surveying, crafts). Adapt Clothing Exchange beyond interviews (graduation, housing appointments).

Eliminate & Rearrange

Drop office costs use shared/rotating spaces. Remove duplicate onboarding to reduce friction. Start with wellbeing + financial stability first, then upskilling and job search. IPS model doubles job-placement odds (~55–59% vs 23–26%) (Bond et al., 2012).

SDG Alignment

Our model ensures long-term transformation by tackling root causes and reinforcing gains across health, work, and financial stability.

SDG Alignment:

- SDG 3 – Good Health & Well-Being: Addresses mental health by contributing to the goal of reducing premature NCD mortality by one-third by 2030 and promoting wellbeing.
- SDG 8 – Decent Work & Economic Growth: Creates inclusive work pathways in line with global targets for sustained economic growth and full, productive employment for all
- SDG 10 – Reduced Inequalities: Empowers marginalized groups, aligned with targets to raise income growth of the bottom 40% and eliminate discriminatory practices
- SDG 1 – No Poverty: Builds income stability, supporting targets to halve poverty in all dimensions and expand social protection coverage

Impact Pathway Example:

Participants start with high need → receive tailored skills, wellbeing support, and financial tools → move into stable work and improved mental health → sustain gains through ongoing platform support and peer networks.

**Participants Transition from
Instability to lasting work**

Calliope Paths

Business Practices

LEAN PRACTICES

Utilizing shared spaces and hybrid delivery can cut fixed overhead by 25–50% compared to standalone setups (Shared Service Centers, Europe)

PARTNER LEVERAGE

NGOs regularly rely on in-kind support—e.g., university partnerships supply materials and pro-bono services, reducing costs and expanding capacity (Cara UK network with 135 universities)

EFFICIENT DELIVERY

Gain-sharing models in vendor partnerships can achieve 10–15% more savings than traditional pricing, boosting resource efficiency

ETHICAL SCALE

UNICEF-equivalent study shows expanding services (like remote education) to additional 1,000 children reduces per-child cost by \$0.50, highlighting scale efficiency

Business Practices Visualisation

Block	Our Model
Problem	Youth unemployment, widening mental health gaps, and persistent income instability limit long-term stability for vulnerable groups.
Solution	CalliopePaths: An integrated platform combining employment pathways, mental wellbeing support, and income stability tools, delivered through a hybrid digital and in-person model.
Key Partners	Local councils, NGOs, refugee organisations, skills training providers, employers, universities, and community hubs.
Value Proposition	A one-stop, tailored, and scalable support system that addresses multiple barriers at once, improving outcomes across employment, wellbeing, and financial resilience.
Revenue Streams	Grants, corporate sponsorship, government funding, and paid provision of micro-services to partner organisations.

Resources, Innovation, and Customers

Resources Needed

- **People:** Trained volunteers, facilitators, and professional training partners.
- **Digital Tools:** No-code platforms for the portal & wellbeing tracker, learning platforms like Coursera or VMock.
- **Spaces:** Libraries, community centres for workshops & cafés.
- **Funding:** For marketing, stipends, and training kits.
- **Current Assets:** Free digital tools, outreach channels, university networks.

Innovative Methods

- **Integrated Approach:** Employment, mental health, and income support in a single ecosystem.
- **Skills-for-Impact Bootcamp:** With embedded mental resilience training.
- **Gig Project Marketplace:** Paid projects for real experience.
- **Income Circles:** Peer-led savings and financial stability support.
- **Hybrid Delivery:** Digital + in-community access for reach and flexibility.

Paying Customers

- **Businesses:** Access to Inclusive Hiring Network, sponsored bootcamp placements.
- **Local Councils:** Co-funding training for target groups.
- **Universities:** Partner on skills development and wellbeing support.
- **Value Proposition:** Impact metrics, DEI benefits, community visibility.
- **Beneficiaries:** Free access to all core services.

Channels & Cost Structure

Communication, Distribution & Sales Channels

- Beneficiaries: Reached via social media campaigns, university job boards, and local community organisations.
- Paying Customers: Engaged through LinkedIn outreach, targeted emails, and CSR networking events.
- Hybrid Delivery: Services delivered via a digital platform, supported by offline workshops in libraries and co-working spaces.
- Purpose: Maximises accessibility for end users and visibility for paying partners while keeping delivery flexible and cost-effective.

Major Cost Elements

How We Fund Impact

1. Tiered Employer Partnerships: Employers choose from Core (£3k), Growth (£10k), or Strategic (£40k) packages. Higher tiers sponsor full participant cohorts, receive diversity & inclusion analytics, and get brand exposure on our platform.
2. Local Authority / University Contracts: Partner with councils (e.g., via UK Shared Prosperity Fund) or universities (via widening participation budgets) on a fee-for-service basis or light payment-by-results.
3. Apprenticeship Levy Transfers: Leverage underused funds from large employers to co-deliver accredited training for our participants.

Business Model & Revenue Mix

1. We sustain impact through a diverse revenue portfolio, combining employer partnerships, public sector contracts, and targeted grants. This blended model reduces dependency on any single source while funding free access for participants.
2. Employer Memberships & Cohorts (35% Plan / 40% Stretch): Tiered packages (£3k–£40k) that sponsor places, fund whole cohorts, and provide DEI analytics to partners.
3. Local Authority Contracts (25%): UKSPF and community funding to deliver bootcamps, wellbeing programmes, and local hiring pipelines.
4. Grants & Philanthropy (30% Plan / 25% Stretch): CSR budgets, foundations, and social impact funds supporting innovation and expansion.
5. Data & Analytics Add-ons (5%): Paid impact dashboards for employers, tracking outcomes like job retention and wellbeing gains.
6. Apprenticeship Levy (5%): Co-delivered accredited training funded through large employer levy transfers.
7. Impact Ratio: Every £1k from partners enables 3–5 free participant places, building inclusive pathways to work, wellbeing, and financial stability.

Potential To Scale

Phase 1

Concept Validation

Co-design with NGOs/councils; similar pilots secure £50k–£250k seed per region (Barclays Eagle Labs).

Map community needs and secure seed funding commitments.

Phase 2

Pilot Launch

Run Skills-for-Impact Bootcamp + Mental Health Cafés in 2–3 councils (~500 users).

Track employment, wellbeing, and income stability KPIs.

Phase 3

Regional Growth

Expand to 3–5 regions with local delivery partners and shared platform.

Phase 4

National Rollout

Scale digital platform and partner network to cover 10,000+ participants.

Diversify revenue via employer access fees, council contracts, and sponsors.

Phase 5

Sustained Impact

Reinvest 70% of surplus into programmes, 30% into reserves & innovation.

Evolve services based on user feedback and emerging needs.

Measuring Success

Key Metrics

Employment

- 70%+ of participants in jobs or income streams within 6 months.
- Average retention: 9+ months.

Mental Wellbeing

- 30% average increase in self-reported wellbeing scores.
- 75% engagement rate in wellbeing activities.

Financial Stability

- 25% average increase in savings over 12 months.
- 40% reduction in reported income volatility.

Tracking Tools

- Digital Mental Health Check-In Tool – measures wellbeing at baseline, midpoint, and completion.
- Platform Analytics – tracks jobs applied, gigs completed, savings milestones, and skill badges.
- Quarterly Reviews – uses data to refine delivery and report back to funders.

Micro-Pilot & Impact Story

Micro Pilot Snapshot

- 3 week test with 4 participants viz community outreach
- 2 skills identified lacking pertaining to excel & Python programming
- 1 peer-led circle demo for identifying income stabilization
- Weekly digital well being check in.

Results

- 80% percent improvement in CV Readiness. Clearance rate of 90% through every ATS the application went through
- Two participants identified economically feasible courses, which was essential to their job requirements
- 40% percent reduced stress level as the participants finally achieved some reply from recruiters
- Cost per participant varied from 20-60 pounds depending on their need & improvement

Jay, an MSc Finance student, joined our 3 week micro pilot through community outreach.

His CV initially failed most application tracking systems (ATS).

Through our Skills for Impact sessions, Jay's CV was restructured to achieve a 90 percent ATS clearance rate. We guided him to a targeted Coursera course on Excel and financial modelling costing 40 pounds, which he completed within the pilot period.

In parallel, our Income Circle helped Jay identify ways to stabilise his budget including cutting down on outside meals, freeing up funds for career development. Within two weeks, Jay secured multiple interview calls and reported a 40 percent reduction in stress.

Closing & Call to Action

Youth unemployment, mental health gaps, and income instability are urgent challenges that can't wait. CalliopePaths offers a unique, integrated model that combines employment pathways, mental wellbeing support, and financial stability tools into one accessible platform, closing service gaps and creating long-term impact for marginalized groups. With our pilot model, delivery channels, and partnerships already in place, we're ready to scale a solution that is cost-effective, flexible, and proven to work. We invite you to join us as a funding partner, strategic collaborator, or pilot site host to turn potential into progress and create lasting change in communities.

Thank You!

Team Calliope Paths
